

IN THE CLAIMS

Please substitute claims 1-8 with the following:

1. (Currently Amended) An organic electroluminescence display in which plural rows of scanning lines and plural columns of signal lines are arranged, and pixels are arranged at ~~the~~ portions where said scanning lines intersect said signal lines, said pixels having an organic electroluminescence layer inclusive of an organic light emitting layer held between ~~the~~ first pixel electrodes constituted by said scanning lines and ~~the~~ second pixel electrodes connected to said signal lines, wherein said ~~plural~~ second pixel electrodes are ~~arranged being~~ overlapped on said scanning lines in a direction in which said scanning lines are extending and each of said second pixel electrodes are arranged over said plural at least two neighboring signal lines. ^{is} ✓

2. (Canceled without prejudice)

B29 3. (Currently Amended) An organic electroluminescence display according to claim 1, wherein each of said second pixel electrodes ^{is} are arranged over ~~the~~ two neighboring scanning lines among said scanning lines. ✓

4. (Currently Amended) An organic electroluminescence display according to claim 2 1, wherein a portion of said second pixel electrodes ^{is} are arranged over ~~the~~ ^{the} at least two neighboring scanning lines among said scanning lines. ✓

5. (Original) An organic electroluminescence display according to claim 1, wherein said signal lines are divided into plural lines in a direction in which they extend.

6. (Currently Amended) An organic electroluminescence display according to claim 2, wherein ~~said signal lines are divided into plural lines in a direction in which they extend~~ each of said second pixel electrodes are connected to one of said at least two neighboring signal lines. ^{is} ✓

B.21 7. (Original) An organic electroluminescence display according to claim 3, wherein said signal lines are divided into plural lines in a direction in which they extend.

8. (Original) An organic electroluminescence display according to claim 4, wherein said signal lines are divided into plural lines in a direction in which they extend.
